

GONZALO VOLANTE

SYSTEMS & DIGITAL TRANSFORMATION LEAD | AI-POWERED PROCESS AUTOMATION

✉ gonzavolante@gmail.com ☎ +54 3876 11118 📍 Salta, Argentina [in] linkedin.com/in/gonzalo-volante 🌐 iavolante.github.io/CV-GONZA

PROFESSIONAL SUMMARY & BUSINESS FOCUS

Software developer and digital solutions consultant focused on solving real operational bottlenecks across companies and SMEs. Specialized in transforming disorganized manual operations (such as scattered Excel spreadsheets and repetitive tasks) into custom, fast, secure, and user-friendly web platforms. My goal is to increase business profitability by reducing operational costs, eliminating manual data-entry errors, and automating administration with Artificial Intelligence so teams can focus on commercial growth.

BUSINESS SOLUTION AREAS

Process Automation & Time Savings:

Elimination of repetitive manual workflows through automated software to accelerate daily operations, cut turnaround from days to minutes, and prevent unnecessary overhead.

Custom Systems & Operational Control:

Centralization of all corporate and operational data, replacing scattered Excel spreadsheets with unified, real-time web control panels.

Artificial Intelligence for Administrative Documents:

Intelligent scanning and parsing of invoices, supplier delivery slips, and bank statements for automated data entry into accounting systems without human intervention.

PROFESSIONAL EXPERIENCE & PROVEN TRACK RECORD

Nuevas Energías (Renewable Energy & Industrial Clients)

Sep 2024 – Present · Salta, Argentina

Systems & Digital Transformation Lead | Central Operations Platform & Commercial Optimization

- End-to-end operational digitization: Replaced scattered Excel spreadsheets with a centralized web management platform that organizes projects, clients, and field operations in one place.
- Instant quotation engine: Developed an automated proposal system delivering complex solar estimates in under 3 minutes, cutting turnaround that previously took up to 48 hours (a 90% speedup).
- Automated utility bill auditing: Created an analytical tool that automatically processes electricity bills, detecting utility penalties and contracted power transgressions without manual review.
- Real-time solar monitoring & savings: Automated telemetry connection with solar inverters to track generated kilowatt-hours and financial savings injected into the grid in real time.
- Commercial channel integration: Connected the core platform to customer messaging (WhatsApp, CRM) for instant lead routing and commercial follow-up.

Laboratorio Bioquímico SARESA (Healthcare Sector)

2024 – Present · Salta, Argentina

Management Software Architect | Comprehensive Medical & Administrative ERP System

- Comprehensive clinical & administrative ERP: Designed and deployed the core operating platform managing patients, medical analysis orders, clinical results, and full financial tracking.
- Automated invoice ingestion with AI: Implemented smart document scanning that processes medical reagent supplier invoices and packing slips, logging validated entries automatically and eliminating manual typing.
- Accounts payable & vendor ledger control: Automated balance tracking and supplier payment allocation, ensuring precise bookkeeping and zero human allocation errors.
- High reliability & speed: Highly reliable platform engineered to run 24/7/365, enabling instantaneous data retrieval across millions of historical clinical records without downtime.

APPLIED BUSINESS SOLUTIONS & TOOLS

Real Estate Auto-Publisher (Publi-Prop) — **Automated Multi-Portal Property Distribution.** Automated platform that bulk-publishes property listings across multiple real estate portals, saving hours of manual data entry for sales and operations teams.

Utility Tariff Auditor & Electricity Cost Analyzer — **Automated Overcharge & Penalty Detection.** Software tool that ingests complex utility invoices to detect billing discrepancies, contracted power penalties, and model financial savings for corporate clients.

Smart Bank Statement Processor — **Automated Credit Card & Expense Reconciliation.** Document extraction tool that parses PDF credit card statements and automatically syncs categorized business expenses into management databases without manual input.

Satellite Land & GIS Monitoring Tool — **Land Asset Monitoring & Regulatory Compliance.** Geospatial platform leveraging satellite imagery to monitor rural land parcels and native forests, facilitating environmental audits and regulatory compliance.
